VOLUME CONTENTS

Volume 59 (1989)

PHYSIOLOGY AND BIOCHEMISTRY

Purification and characterization of phosphoribulokinase from the N_2-fixing cyanobacterium *Anabaena cylindrica*
by J.L. Serra, M.J. Llama, P. Rowell and W.D.P. Stewart (Dundee, U.K.) 1–9

Galactose metabolism in *Zea mays* root tissues observed by ^{31}P-NMR spectroscopy
by B.C. Loughman, R.G. Ratcliffe and J.W.R. Schwabe (Oxford, U.K.) 11–23

Phospholipase D of rice bran. I. Purification and characterization
by M.H. Lee (Taipei, Taiwan) 25–33

Phospholipase D of rice bran. II. The effects of the enzyme inhibitors and activators on the germination and growth of root and seedling of rice
by M.H. Lee (Taipei, Taiwan) 35–43

ADP as a phosphoral donor for banana-6-phosphofructokinase
by K.K. Surendranathan and P.M. Nair (Bombay, India) 45–51

Restriction of pollen germination and tube growth in lily pollen by inhibitors of polyamine metabolism
by M.V. Rajam (New Delhi, India) 53–56

Polygalacturonase in pollen from corn and other grasses
by R. Pressey and B.J. Reger (Athens, GA) 57–62

Brassinosteroids: potent inhibitors of growth of transformed tobacco callus cultures
by P.S. Roth, T.J. Bach and M.J. Thompson (Karlsruhe, F.R.G. and Beltsville, MD) 63–70

Failure to detect UDP-glucose phosphorylase in the developing endosperm of maize and wheat
by R.H. Tyson and T. Ap. Rees (Cambridge, U.K.) 71–76

GENETICS AND MOLECULAR BIOLOGY

Characterization of new DNA sequences of *Chlamydomonas reinhardtii* that replicate autonomously in *Saccharomyces cerevisiae*
by R. Loppes, F. Dumont, B. Peers and J. Piette (Liège, Belgium) 77–86

An extranuclear gene contributes to the regulation of cell division of the unicellular green alga *Chlamydomonas reinhardtii*
by J. Voigt and P. Münzner (Hamburg, F.R.G.) 87–94

The nucleotide sequence and expression of the gene for the 32-kDa quinone-binding protein from rice (*Oryza sativa* L.)
by A. Kanno and A. Hirai (Nagoya, Japan) 95–99

CELL AND TISSUE STUDIES IN VITRO

A study on isolation and culture of pollen protoplasts
by C. Zhou (Wuhan, China) 101–108

Development of nitrogen assimilating enzymes during growth of cells derived from protoplasts of sunflower and tobacco
by P. Lenee and Y. Chupeau (Versailles, France) 109–117

Penicillins and activity of nitrogen metabolism enzymes in plant tissue cultures
by I. Santos and R. Salema (Porto, Portugal) 119–125

GENERAL

Observations of the isolated embryo sac of *Zea mays* L.
by V.T. Wagner, Y.C. Song, E. Matthys-Rochon and C. Dumas (Lyon and Villeurbanne, France) . 127–132

PHYSIOLOGY AND BIOCHEMISTRY

Temperature-dependent formaldehyde metabolism in bean plants. The heat shock response
by E. Tyihák, Z. Király, G. Gullner and T. Szarvas (Budapest, Hungary) 133–139

Alternative energy-yielding substrates for bacteroids isolated from stem and root nodules of *Sesbania rostrata* submitted to O_2 restricted conditions
by J.C. Trinchant and J. Rigaud (Nice, France) 141–149

Allomyces Ca^{2+}-activated neutral protease: interaction with phospholipids and plasma membranes
by M. Ojha (Geneva, Switzerland) 151–158

Studies on UTP compartmentation in the synthesis of cytoplasmic rRNA and tRNA and half life of both RNA species in *Euglena gracilis*
by U. Karnahl and C. Wasternack (Neuwerk, G.D.R) 159–165

Formation of aromatic amino acids and valine from $^{14}CO_2$ or 3-[U-^{14}C]phosphoglycerate by isolated intact spinach chloroplasts. Evidence for a chloroplastic 3-phosphoglycerate → 2-phosphoglycerate → phosphoenolpyruvate → pyruvate pathway
by D. Schulze-Siebert and G. Schultz (Hannover, F.R.G.) 167–174

GENETICS AND MOLECULAR BIOLOGY

Genetic transformation of potato (*Solanum tuberosum*): an efficient method to obtain transgenic plants
by R. Tavazza, M. Tavazza, R.J. Ordas, G. Ancora and E. Benvenuto (Rome, Italy and Oviedo, Spain) 175–181

CELL AND TISSUE STUDIES IN VITRO

Cytohistological studies on the action of vitamin D_3 and stigmasterol on *Phaseolus vulgaris* roots growing in vitro
by L. Talmon, M. Vega, B. Mujica and R. Boland (Bahía Blanca, Argentina) 183–190

Production of tropane alkaloids by hairy root cultures of *Duboisia leichhardtii* transformed by *Agrobacterium rhizogenes*
by Y. Mano, H. Ohkawa and Y. Yamada (Hyogo and Kyoto, Japan) 191–201

Micropropagation of *Citrus mitis* Blanco – multiple bud formation from shoot and root explants in the presence of 6-benzylaminopurine
by G.E. Sim, C.J. Goh and C.S. Loh (Singapore, Republic of Singapore) 203–210

GENERAL

Polymorphism and electrophoretic patterns in *Ambrosia maritima* L., *A. artemisiifolia* L. and *A. trifida* L. (asteraceae)
by L. Triest, M. Van de Vijver and J.J. Symoens (Brussels, Belgium) 211–218

Subject Index Volume 59 219–221

Author Index Volume 59 223

Contents Volume 59 225–226
